

White Plastic Padlock Security Seal with Large Metal Wire Ring - 100 Pack

Durable Construction: Made from strong plastic with a large metal wire ring, providing long-lasting security in logistics, transport, and utilities.

Tamper-Evident Design: Clearly shows evidence of tampering or unauthorized access, ideal for securing utility meters, water, gas, and electrical equipment.

Easy to Apply: Simple pull-through locking mechanism allows for quick application without tools, perfect for high-volume use in transportation and meter installations.

Unique Identification: Customizable with logos, sequential numbers, and barcodes, offering traceability for industries like utilities, banking, and cash handling.

Versatile Applications: Suitable for containers, trucks, utility meters, doors, and more, providing a flexible security solution across logistics, utilities, healthcare, and retail.
